

bitcoin *paper wallet*

- ▶ Paper wallets should be produced on a computer not connected to the internet.
- ▶ It is recommended to encrypt the private key with a password using BIP38 encryption.
- ▶ To deposit additional funds to this paper wallet, send bitcoins to its public address, anytime.
- ▶ Verify your balance by searching for the public address using a service such as blockchain.info
- ▶ **DO NOT REVEAL THE PRIVATE KEY** until you're ready to import the balance on this wallet to a bitcoin client, exchange, or (online) wallet.
- ▶ When withdrawing your funds from this wallet you should remove the **ENTIRE BALANCE**.
- ▶ Once the private key is exposed, to a third party/application, this paper wallet should be considered 'HOT' and can't be used for COLD STORAGE anymore. A new paper wallet needs to be made to regain maximum security.
